Developer, SAP Labs India
vivekzhere@gmail.com
+917899756010

INTEREST

Cloud Software, Data Structures and Algorithms, Operating Systems, Embedded Systems, Computational Complexity, Kubernetes, Cloud Foundry

EXPERIENCE

- **SAP Labs** Bangalore, India
Developer *July 2016 - Present*
 - **Virtual Machines as a Service:** *Node.js, Golang, Cloud Foundry, Openstack, AWS*
Implemented an OSB compliant service broker for providing Virtual Machines as a Service on Cloud Foundry PaaS. Used Openstack and AWS to provision various infrastructure resources. Used nodejs and golang for this project which ran for around 18 months.
 - **MongoDB as a Service:** *Cloud Foundry, BOSH, Python, Shell, Ruby*
Part of the team providing MongoDB as a service on SAP cloud platform based on Cloud Foundry for a short period. Worked on a proposal for backup and restore of sharded mongoddb clusters.
 - **Postgresql as a Service:** *Golang, AWS, Cloud Foundry, BOSH, Python, Shell, Ruby*
Part of the team providing Postgresql as a service on Cloud Foundry for a short period. Implemented HA setup for postgresql on AWS multi az scenarios.
 - **Backing Services for Kubernetes:** *Kubernetes, Golang, Kubernetes Operator*
Part of postgresql for kubernetes team which is implemented a k8s operator for Postgresql on kubernetes.
 - **Service Fabrik:** *Cloud Foundry, Kubernetes, Golang, Node.js*
Currently part of service fabrik team, which is a generic OSB compliant service broker. Implemented a component which enabled service fabrik to work with any Kubernetes operator to provision services on k8s. Used golang in this opensource project. Project is hosted at github.com/cloudfoundry-incubator/service-fabrik-broker.
- **Broadcom Communications Technologies Pvt. Ltd.** Bangalore, India
Engineer Software Development *July 2013 - July 2014*
 - Implemented a flow control module for Wifi Host Driver for PCIe based wifi chips
 - Implemented intra bss packet transfer in SoftAP mode for PCIe based wifi chips.
 - Implemented power save mode support in SoftAP mode for PCIe based wifi chips
 - Worked in designing the software architecture of a low power wifi chip.

EDUCATION

- **Indian Institute of Technology, Kanpur** 2014 – 2016
Masters Degree in Computer Science and Engineering; CPI: 8/10
- **National Institute of Technology, Calicut** 2009 – 2013
Bachelor of Engineering in Computer Science; CGPA: 8.84/10
- **St. Antonys Public School (CBSE)** 1994 – 2009
XII (AISSCE); Score: 92.6% *X (AISSE)); Score: 90.2%*

M.TECH THESIS

- Proved that for every language in NL there exists an unambiguous nondeterministic algorithm that requires $\mathcal{O}(\log^2 n)$ space and simultaneously runs in polynomial time.
- *Vivek Anand T Kallampally, Raghunath Tewari. Trading Determinism for Time in Space Bounded Computations* In Proceedings of the 41st International Symposium on Mathematical Foundations of Computer Science(MFCS 2016) [arxiv-1606.04649]

ACADEMIC PROJECTS

- **Experimental Operating System and Virtual Machine:** *C, Lex, Yacc*
Design and implementation of an experimental operating system and underlying architecture with basic features like multiprogramming, virtual memory and file system as part of developing a complete coursework for Operating Systems Laboratory. The project also included design and implementation of two language compilers, one for programming the operating system and one for programming application programs to run on this operating system. The project is hosted at xosnitc.github.io
- **Compiler:** *C, Lex, Yacc*
A compiler for a Simple Integer Language (SIL). SIL included two basic data types Integer and Boolean, features like if, if-else, while, arrays and functions. Functions take any number of arguments and return a single value. Arguments can be passed by value or by reference. Function recursion is also implemented.
- **Bulls N Bears:** *HTML, PHP, CSS, MySQL, Adobe Photoshop*
This project delivered the website bullsnbears.tathva.org. It was a stock market simulation game as part of Tathva 11. The virtual market was synchronized with the actual NIFTY market. The players could buy, sell, short sell and cover equities over a period of 1 month.
- **Stegobot in Google Plus:** *Python, PHP, MATLAB*
Implemented a Trojan Horse which steals saved passwords from Google Chrome, encodes them in images and spreads through Google Plus. The passwords are retrieved using a Google Plus / Picasa Application, which scans shared pictures for stolen passwords.
- **Emart:** *HTML, PHP, CSS, PostgreSQL, Adobe Photoshop*
A simple Internet Shopping Platform. This project was done as part of undergraduate DBMS course.
- **Library Management Software:** *C++*
A Library Management Software developed fully in C++. The database of the Software was implemented using the file feature in C++. This project was done as part of Computer Science course of class XII.

PROGRAMMING SKILLS

- | | |
|---|--------------------------------------|
| • Languages: Golang, Node.js, C | • Parser Generator: Lex, Yacc |
| • Web Scripting: Basics of PHP, HTML and CSS | • OS: Windows, Linux |

RELEVANT COURSES

- | | |
|---|-------------------------------------|
| • Approximation Algorithms | • Design and Analysis of Algorithms |
| • Computational Complexity | • Linear Programming |
| • Computational Number Theory and Algebra | • Maths for Computer Science |

AWARDS AND ACHIEVEMENTS

- Filed for a patent around migrating virtual machines across IaaS
- Was awarded the meritorious 0.1% certificate by AISSCE and AISSE for scoring 100 in Mathematics
- GATE 2013 CSE All India Rank 42
- GATE 2014 CSE All India Rank 86
